D2.13 - Mortgage with Scotia. Servitudes mentioned in the Declaration of co-ownership.

When the roof was redone the rooftop terrace was removed - unsure if it will be replaced or not, in discussions.

According to previous owner:

A minor water infiltration occurred in 2017 at the rear entrance due to snow accumulation near the parking area door. The issue was addressed through improved snow removal practices and did not reoccur. Also in 2017, a water supply pipe temporarily froze during an extreme cold spell while many residents were away, resulting in a temporary loss of water service to Unit 201. The pipe was thawed and restored, and no further issues were reported. In 2014, the prior owners disclosed a water leak caused by a defective toilet pump; repairs were completed at the time, and subsequent owners did not experience any recurrence.

The following work was completed:

- Quartz countertop installed in 2018
- Ceramic backsplash installed in 2018
- Thick wood-veneer countertop installed in 2018
- Bathroom vanity and sink installed in 2017
- Vanity cabinet installed in 2017
- New light fixtures installed in 2017-2018
- Caulking beneath the balcony parapets in 2019
- Addition of shelving in closets and bedroom in 2021
- Building of office space in 2024
- Caulking of joints on all doors and windows in the condominium in 2026

Recent window maintenance and improvements have been completed, including the replacement of thermopanes where required, added insulation, and servicing or replacement of components of the window crank mechanisms.

The condominium syndicate is well managed and compliant with Bill 16 requirements. Several major building improvements have been completed in recent years, including the roof replacement, with the window work representing the most recent major project.
